

We offer taxidermy of hunting trophies and animals

Our work uses new technologies and innovations in the taxidermy, which are a long-term guarantee for your hunting trophies. Years of experience in the field and many satisfied customers = top, first-class work. All this at a reasonable price and time, according to your needs.

Interesting commissions for hunting agencies

Delivery times 3 – 4 months

Guarantee of quality

Import and export

Reasonable prices

Why us?

- Your trophies will look alive! Faithful preparations are our priority! Don't let the memory of your hunts be spoiled forever by unprofessional preparation.
- The feeling for the correct modelling of details is the most important element of preparation, with which a real taxidermist must be born!
- We spend special attention to detail, because it is this that creates a truly faithful image of a living creature.
- We use only original glass eyes for each type of animal separately. Jaws only of the highest quality. The latest anatomical models, often completed directly in our workshop.
- Every order is important to us and is executed precisely! We prepare everything from badger to elephant.
- The creation of faithful expositions of, for example, a predator in the hunt for prey with the completion of the surrounding environment captures real stories from the animal kingdom.
- We create our own unique models of slides according to the customer's wishes.
- We will process large and small orders according to your requirements and ideas.
- 🐡 We cooperate with many hunting agencies throughout Europe.

Our specialization

We are specializing in the preparation of scenes from nature, fights and real stories. We like to take the preparation to the next level. Modern sculptures according to your wishes are always a nice challenge for us!
